PERSONAL PROFILE

I am a Junior Web Application Developer (Full-Stack) with an extensive background as Language Service Provider and Customer Assistant and a Master's Degree in Conference Interpreting.

Studying, working and living in 4 European countries helped me develop a truly global mindset, the ability to adapt and the courage to take up new challenges.

After more than 7 years of professional experience as a translator, conference interpreter and language specialist, I have decided to dive in the world of programming, with a full-time Web application development training. I am currently looking for an internship opportunity in June-July 2021 to continue improving my skills.
